

This painting and sculpture show is the fifth in a series of exhibits organized by the Barn Workshop School of Fine Arts and Crafts and sponsored by the Sheraton Ferncroft Resort. It explores the boundaries and diversity of expression possible in abstract art.

Expressions features multiple works of several talented artists. Some of the many themes explored in this exhibit include: the tension existing and/or created in different environments, the impact of various forces on or within an environment, elements and forces of nature that serve as metaphor for understanding or illuminating the human condition, the relationship of form, line, materials and composition to the expression of human and other energies, pursuits and phenomenon.

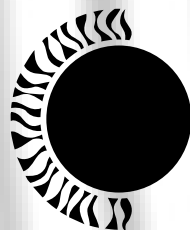

Artworks selected for exhibit in this show provide the viewer with a broad collection of artistic expression and styles - ranging from the very whimsical to the very serious. As a result, and in many different ways, the works invite (and challenge) the viewer to engage in an understanding of abstract art and the power of artistic expression to convey meaning and larger context to our everyday lives.
